

CONSOLIDATED LAUNDRY MACHINERY

VacFeed

MODEL VF-1

FEATURES:

- Increases ironer production
- Operators need only feed the leading edge of linens while the VacFeed does the rest
- Ensures consistent quality in all your ironed linens
- Eliminates creases
- Adjustable height
- Installs in minutes

CLM's VacFeed will increase the efficiency of your workers while ensuring consistently high production quality.

The VacFeed is a proven approach to the feeding of tabletops and other large pieces. It works with virtually any ironer, minimizing loss of ironer capacity between items as occurs with normal hand feeding.

Operators simply place the linen on the feed ribbons of the ironer. Once the leading edge of each item is fed, the VacFeed takes over and your workers are free to pick up the next item. Meanwhile, using powerful suction, the VacFeed spreads and straightens the linen as it enters the ironer. Creases are eliminated.

The VacFeed features adjustable height and does its work by a simple downdraft of air. With a VacFeed in place, you can increase your production and quality while minimizing the number of employees needed to operate your ironers.

TECHNICAL SPECIFICATIONS:

WIDTH

119"

DEPTH

21"

HEIGHT

33" TO 50" (adjustable)

WEIGHT

900 pounds (net)

1050 pounds (shipping)

FAN

3 HP, totally enclosed, fan cooled

ELECTRICAL REQUIREMENT

208/230/460/ Volts, 3 Ph., 60 cycle

CONTROLS

A dust-proof control box is mounted on the end of the VacFeed. A start/stop button and motor overload protection are provided.

Specifications subject to change without notice

The VacFeed virtually eliminates creases in tabletops and other large pieces.
